Aeye Security Lab Inc.

Aeye Security Lab Joined OWASP Corporate Supporter
-Aeye keeps trying to make an effort to become a safe internet environment for anyone-

---

We are delighted to announce that Aeye Security Lab Inc. joined Open Web Application Security Project (OWASP) Corporate Supporter.

■Background

Aeye Security Lab Inc. (Aeye) is offering AeyeScan which is a SaaS web application vulnerability diagnosis platform, takes advantage of AI and RPA (Robotic Process Automation). "Through the AeyeScan, state-of-the-art diagnosis become popular anytime anyone, as easy as you can" says Aeye. OWASP promotes important activities such as "OWASP Top 10" which is a guideline designed to enhance application security. Through the activity to share trends and technologies with OWASP, Aeye keeps trying to make an effort to become a safe internet environment - for anyone.

■Endorsement

Joining the OWASP, we are commemorated and received the following endorsements.

OWASP Japan chapter leader Mr. OKADA Riotaro

I'm very welcome to Aeye join the OWASP Corporate Supporter. Application security is an increasing weight of importance to structure the internet as a secure lifeline. Also, while application development methodologies are getting diverse, Fundamentals are known that most vulnerable codes and components become Weakest Link. How can we achieve secure applications? - people widely involved in development are faced with unsolved challenges. Let's share Aeye's professional real field activity with this global community. My best wishes to you!

OWASP Japan chapter leader Mr. UENO Sen

OWASP centering on Web applications, are engaged in international activities related to the security of various software. To counter the threats that are updated daily, the cooperation of companies with the latest technology and knowledge, such as Aeye, is indispensable. Members of Aeye have been cooperating with the "Pentester Skill Map Project" from before, we sincerely welcome your support as an OWASP Corporate Supporter.

■About Us

Established in April 2019 with the philosophy of "solving the shortage of security engineers with our high-level technologies". A group of cyber security technology professionals. Especially we provide development and various consulting of security services utilizing the cloud by members who have deep knowledge and experience in web application security.
